

The ACCURA 4 is still remarkably stable in turbulent conditions as was the ACCURA 3. It is very agile with well balanced handling. The thermalling characteristics are phenomenal. With new features the ACCURA 4 is really a great glider!

With stunning performance and unique in-flight stability, the ACCURA 4 will please low-airtime pilots just as much as experienced well seasoned-pilots!

#### FEATURES OF THE ACCURA 4

- » Lightweight and compact (ideal for hike and fly)
- » Balanced, agile handling
- » Easy launch behaviour
- » Best performance in its class
- » High safety performance and unique in-flight stability
- » High-quality materials with accurate workmanship
- » SST technology
- » New wing tip shape increasing aspect ratio
- » Optimised wing tip air inlets with mesh openings for improved inflation characteristics
- » Improved design on rib & v-rib
- » New features result in improved launch and ground handling characteristics
- » Increased rib-to-rib vent function
- » Exciting new colours and canopy design
- » EN/L TF B certification on all sizes
