

PLUS ONE the new tandem wing from PRO DESIGN takes tandem flying to the next level. The PLUS ONE has a super easy launch, and remains stable over the pilot even in difficult conditions. The pilot can easily control the pitch and roll of the glider due to its precise handling.

In flight the PLUS ONE has great handling, turning efficiently in thermals, taking you to the top. The PLUS ONE has good glide throughout the entire speed range with a high top speed. The stability provides a comfortable ride for you, and your plus one (passenger). The PLUS ONE has a high energy retention, which allows for an excellent flare on landing.

FEATURES OF THE PLUS ONE

- » Reduced weight using high-quality high-tech fabric
- » Aspect ratio of 5.2 for maximum passive safety
- » Reinforced leading edge with nylon rods
- » Big ear cleat system with easy activation and release of big ears
- » TETS braking system for improved handling in carving style turns
- » Double 3D shaping of leading edge for optimal shape and increased efficiency
- » Optimized internal diagonal structure for best load distribution and weight saving
- » Cell openings positioned for best internal pressure and penetration
